

WHY IS EXE-TC SUSPENSION SO SUCCESSFUL?

Building on our design success, with Prodrive (98>02) and now with Citroen Sport (03>10), we have taken the best points of a competitive World Championship winning suspension and developed one of the most efficient customer Circuit & Track systems, that money can buy.

EXE-TC's suspension together with our driver support programme, gives you more confidence in your;
- chassis under braking - tyres on turn in - mid corner lateral grip - power down on acceleration.

TO BE A CONTENDER, YOU NEED THE BEST EQUIPMENT!

SUSPENSION CAR SETS (manual):

One/Two Way Adjustable Damping + Ride Height. The improved sensitivity of low speed damping, results in increased tyre grip and chassis control (pitch and roll).

FROM £3996.00 set

SUSPENSION CAR SETS (active electronic):

Fully programmable, Active, Two Way Adjustable Damping, has all the characteristics of the manual System, plus the added active advantages, meaning; the suspension adjusts as the vehicle is travelling. The suspension's ECU program, takes information from the throttle position, brake pressure, steering position, and wheel speed sensors, to develop its operating parameters.

FROM £6260.00 set

Porsche 996 GT3

Porsche 997 GT3

Nissan GT R

Mitsubishi EVO VI-IX + X

Subaru 05-07 + 08-10

COMPETITION TOP MOUNT PLATES:

CNC'd from 2014 alloy, with high angularity competition spherical bearing, results in a more direct change of direction and in less bending loads on the suspension.

FROM £122.00 each
